

## MY APP:

Micaela Tischendorf

DVC 9/10

2015

YR9

# PLAN:

- ▣ In my planning process I researched multiple sites until I found the one that had the right ideas but the pen friend app idea was my own to discover as I find it hard to find a good app for making over seas friends and also learning their language so I can communicate with them so the don't have to speak English because that is one of the hardest languages to get perfect, its also easier for them too!

# FREE HAND SKETCH:

- ▣ I decided to be a little bit different and not add a free hand sketch because well my ideas couldn't be expressed in a drawing and I felt it would only be fair to use my vocabulary skills and not my drawing skills because I generally am not great at drawing.
- ▣ Also it just felt more natural to type a long paragraph after making my story last week.

# IDEAS:

These were my planned apps, as you can see the app I have planned to create above if the second idea on the list.

## A Day Out App:

This app would help you to decide where to go for a day out. You would simply enter your budget and the distance you want to travel, and the app would bring up a list of local tourist attractions for you and your family or friends to enjoy.

## Pen friend app:

Pen Friend App would assist you to learn a foreign language by communicating directly with a native speaker through the app be able to converse with them in both languages. There may be many other useful tools included in the app.

## PERFECT DATE APP:

This app would provide you with tips on how to act and what to say when you are out on a date. You may refer to it for advice on topics such as breathing techniques, conversation openers and many more.

## DELIVERY APP:

This app would be used to find the cheapest and quickest courier service to send your parcel to. You would fill in the size, weight, delivery location and postal code and then order the cheapest

and have the reviews posted on social media sites. Linking your social media reviews to the product will help retailers advertise their products freely.

## TURN A PHOTO INTO A SKETCH APP:

Taking a photo on your device and turning it into what appears to be a hand-drawn sketch is just a few taps away with Pencil Sketch Free. The free app allows you to import an existing photo and choose between a few different colouring and sketching techniques. You're also able to control the colour and theme of the picture-turned-drawing. When you're done, you can share it through the usual methods.

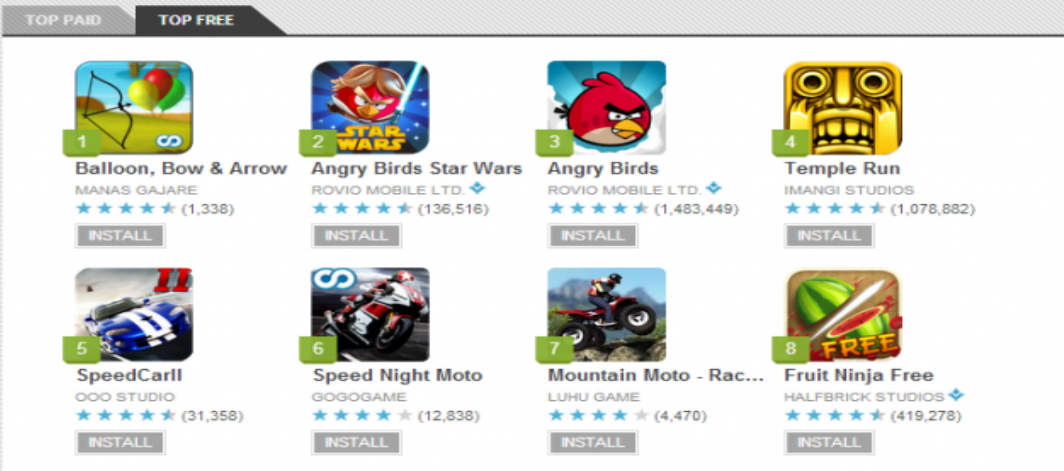

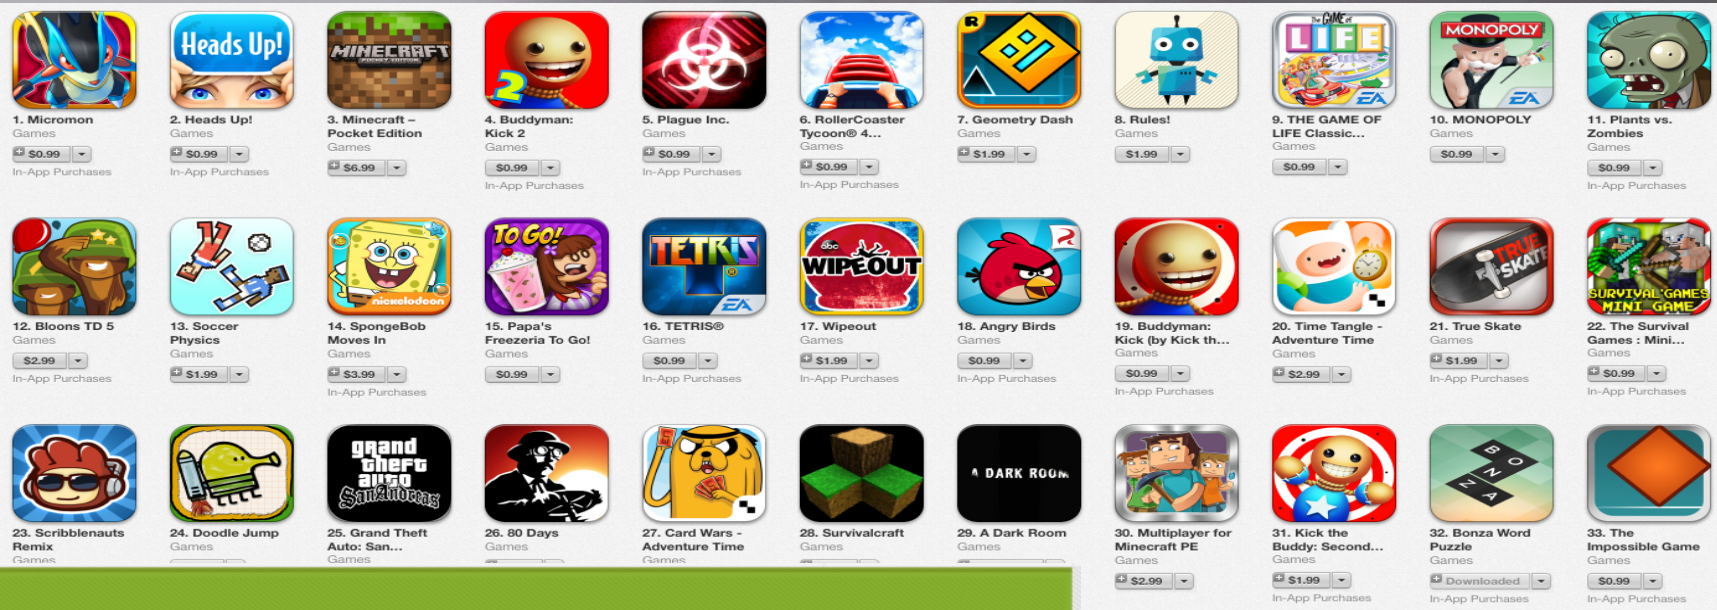

## CALENDER AND SUGGESTED GIFTS APP:

(Someone requested this, this is their comment)

I'd love to use a calendar that reminds me about friends, family & co-workers birthdays in advance and suggests gifts and give me places where I can buy them.

# SCREENSHOTS FOR APP STORE/ PLAY STORE:

# IDEA BEHIND:

- ▣ In the process of deciding on what to call and how it would run smoothly, I thought long and hard about it and finally thought 'languages' because if I want to learn a new language I find it really difficult to learn another language by listening to someone on another app say the word then getting me to repeat it.
- ▣ It was easy for this idea to pop into my head because trying new things is something that I find cool whether it is learning a new language or a new sport or something that I haven't done before in my short life I have lived so far.

# INSPIRATION:

- ▣ I got inspired in many ways such as:
  - ▣ Playing games
  - ▣ Watching YouTube videos
  - ▣ Searching up ideas on google
  - ▣ Mucking around on sumo paint
- ▣ Finally: Talking, talking to people gave me inspiration on what they would like to see in an app on android or apple devices.

# SOURCES:

- ▣ <http://myapptemplates.com/99-iphone-app-ideas-that-could-make-you-rich-the-full-list/>
  - ▣ DVC 2015 (year 9/10)
  - ▣ GOOGLE CHROME
  - ▣ MICROSOFT WORD 2010
- ▣ MICROSOFT POWERPOINT 2010

# THOUGHTS:

- ▣ This is based around people who cant get internet, it will be friendly to all areas of the world and also would have a unique design fit for any personalities so the users feel comfortable with the layout and the background picture.
- ▣ The app was made to be simple to use and perfect for anyone to use by their own choice.
- ▣ I thought that if I was to make money I would make two versions one costing money to buy and one free for people without money.
